# Quick Start Guide

## Get Started

- Charge battery completely before use
- Default recording is the built in memory feature
- Use your own SD card, by formatting it
- Back-up recorded data to PC often to avoid accidental deletion
- Turn camera on with power button, you need to select from modes:

  **Record Video:**
  - 🎥

  **Take Pictures:**
  - 📸

  **Play:**
  - ⚡

- Hold down the lock/release button while turning to the mode you selected

## Taking Video

- Change mode to: 🎥
- Open the LCD monitor to extend the viewfinder
- Built in memory is the default
- Press the record button, below
- Pictures shows where to locate this button.

## Upload Video & Pictures to PC

- Take video with camcorder
- Plug mini usb cable to camera and PC
- Turn on camera to play mode
- LCD monitor automatically asks what kind of device you want to upload to: PC
- A pop-up menu will appear—select import pictures and video, tag with your own preferences
- Move files to the destination on your choice on your PC

## Taking Still Pictures

- Change the mode to: 📸
- Open the LCD monitor to extend the viewfinder
- Press the camera button to take the picture.

- Use LCD monitor to frame the photo
- To take picture press located on the top of the eyepiece

## Battery Charging

1. Insert the battery into the AC cable battery slot—matching up grooves
2. Plug the AC cable into the transformer and a wall outlet
3. Charge should be completed in approximately 25 minutes
