American College of Veterinary Sports Medicine and Rehabilitation

Topic Rubric for the 2018 Core Knowledge Board-certification Examination

The following table provides a detailed outline of the topics and estimated percentage distribution of material to be covered in the 2018 Core Knowledge Examination.

<table>
<thead>
<tr>
<th>Percentage Distribution</th>
<th>CORE KNOWLEDGE EXAMINATION</th>
</tr>
</thead>
</table>
| 9%-13%                   | **1. Tissue-based Pathophysiology**  
• Addresses the anatomy, physiology, biomechanics, pathology, mechanisms of injury, and principles of wound and tissue healing  
• Includes the following tissue types: Integument, connective tissue, muscle, tendon, ligament, bone, articular cartilage, and synovium |
| 6%-10%                   | **2. General Medical Issues of Animal Athletes**  
• Addresses the anatomy, physiology, pathology, and medical diagnosis and management of muscular, nervous, respiratory, cardiovascular, gastrointestinal, and lymphatic disorders associated with sports medicine and rehabilitation issues across species |
| 10%-15%                  | **3. Kinesiology**  
• Addresses topics related to physical examination, gait analysis and lameness evaluation  
• Includes neurophysiology of proprioception, motor control, and gait mechanisms  
• Includes the following methodologies: Motion analysis, force plate analysis, pressure mats, and inertial sensors |
| 6%-10%                   | **4. Exercise Physiology**  
• Addresses general conditioning and training principles, energetics, thermoregulation, electrolytes, fluid balance, and nutrition related to exercise and performance across species |
| 14%-19%                  | **5. Diagnostic Imaging**  
• Basic principles and applications of radiology, ultrasonography, nuclear scintigraphy, computed tomography (CT), magnetic resonance imaging (MRI), and thermography |
| 7%-11%                   | **6. Diagnostic Methods**  
• Addresses topics related to clinical and laboratory measures of musculoskeletal and neurologic function and dysfunction  
• Includes the following methodologies: Diagnostic local analgesia, clinical pathology, electromyography, goniometry, pain scales, and pressure algometry |
| 8%-11% | **7. Nociception and Pain Mechanisms, Pharmacology**  
Addresses general concepts and foundational knowledge related to:  
• Neurophysiology of nociception and pathophysiology of pain  
• Pain management, anti-inflammatories, analgesia  
• Performance-enhancing drugs, ergogenic substances, nutraceuticals |
| 12%-18% | **8. Physical Rehabilitation**  
Addresses general concepts and foundational knowledge related to:  
• Manual therapy (e.g., massage, stretching, mobilization)  
• Physical modalities (e.g., thermal, mechanical, electromagnetic, photic)  
• Therapeutic exercises (e.g., flexibility, proprioception, motor control, strength, endurance) |
| 6%-8% | **9. Intra-articular Medications and Biological Therapies**  
Addresses general concepts and foundational knowledge related to:  
• Intra-articular medications: hyaluronic acid, corticosteroids  
• Gene therapy, stem cell therapy, platelet-rich plasma (PRP), and interleukin-1 receptor antagonist protein (IRAP) |
| 4%-7% | **10. Surgical Considerations in Veterinary Sports Medicine and Rehabilitation**  
Covers foundational concepts of the biological and biomechanical aspects of general, orthopaedic, and neurologic surgery:  
• Biomechanical features of orthopedic injuries  
• Fundamental issues related to joint immobilization  
• General principles of fracture fixation and soft tissue repair  
• Biological features of upper airway surgery  
• Biological and neurophysiologic outcomes of neurosurgery and related procedures |
| 3%-6% | **11. Integrative Veterinary Medicine**  
• Addresses general principles and practice of acupuncture, chiropractic, botanicals, and homeopathy as these fields relate to veterinary sports medicine and rehabilitation |
Reading List for the 2018 Core Knowledge Board-certification Examination

Please note that this is a guideline for a reading list of textbooks suggested for preparation for the 2018 Core Knowledge examination with the American College of Veterinary Sports Medicine and Rehabilitation.

Each of the selected textbooks contain chapters with core material pertinent to the development of a working knowledge within the field of veterinary sports medicine and rehabilitation. The applicant will be responsible for material within relevant (or included) chapters related to the basic science and clinical practice of veterinary sports medicine and rehabilitation.

Disclaimer: Due to the very diverse knowledge base required of sports medicine and rehabilitation, this reading list is suggested, but not all inclusive. Candidates should use the American College of Veterinary Sports Medicine and Rehabilitation examination rubric for identification of examination topics and the percentage distribution of examination questions within in each topic area as the basis for preparation for the respective examinations.

Selected Core Knowledge Textbooks

   INCLUDING the following chapters: 1-10

   INCLUDING pages 18-29 in Chapter 2.

   INCLUDING the following chapters: 1-3, 6-31.

   INCLUDING the following chapters: 6-13, 38-39, 42-46, 62-64.

   INCLUDING the following chapters: 1-2, 4, 7-8, 12, 15, 17, 74-77.

   INCLUDING the following chapters: 1-17.

INCLUDING the following chapters: 2-8, 45,49.

INCLUDING the following chapters: 8, 10-17, 19

INCLUDING the following chapters: 1-3, 13, 14

INCLUDING the following chapters: 1-25

INCLUDING the following chapters: 1, 4, 6, 7, 10, 14-16, 19-20, 22, 41-46, 49.
